

Rajesh Goud Budidi

Software Engineer

📞 9441049014 ✉ budidirajeshgoud@gmail.com 🔗 linkedin.com/in/rajeshbudidi/ 🐙 github.com/rajeshgOud 📁 portfolio

Professional Summary

Aspiring Full-Stack Developer with 5 months of hands-on experience developing scalable web applications using **React.js** and **Java Spring Boot**. Contributed to a multilingual EdTech platform supporting 100+ courses, with secure user authentication and integrated payment systems. Passionate about building intuitive **user interfaces** and collaborating with cross-functional teams to create **impactful, user-centric solutions** that drive engagement and satisfaction.

Skills

- **Programming Languages:** Java, JavaScript (ES6)
- **Frontend Technologies:** React.js, Redux, Tailwind CSS, HTML5, CSS3
- **Backend Technologies:** Node.js, Java spring boot
- **Version Control:** Git, GitHub
- **Tools & Platforms:** Vercel, render.com, VS Code, IntelliJ

Education

- **Bachelor of Technology (B-Tech) in Electronics and Communication Engineering**
JB Institute of Engineering and Technology, Hyderabad, Telangana
Graduation Date: July 2022 | **GPA:** 7.6/10.0
- **Relevant Coursework:** Programming Fundamentals, Java Programming, Basics of Web Development

Work Experience

Full-Stack Intern | PRT Software Solutions

Technologies: React.js, Java, Redux | **September 2024-February 2025**

- Designed and developed a multilingual responsive EdTech platform using React.js, Redux, and CSS, supporting 100+ courses and increasing user retention by 20%.
- Integrated Google Authentication for secure user login and registration, securing 400+ user accounts.
- Assisted in backend development with Java and RESTful API integration, enhancing platform performance and scalability by 30%.
- Collaborated with a 5-member cross-functional team, leveraging Git and GitHub for efficient project management and version control.

Projects

Freelance Project: Navik Online – navikonline.in

Technologies: React.js, Redux, Tailwind CSS

- Developed a responsive, user-centric frontend for **Navik Online**, a platform providing free programming courses to 100+ students.

- Implemented secure authentication and state management using React.js and Redux, improving user retention by 15%.
- Styled the platform with Tailwind CSS, incorporating a dark/light mode toggle, boosting accessibility and user experience.

Online Food Ordering App – [GitHub Link](#) | [Live Link](#)

Technologies: React.js, Redux, Node.js, Express.js, MongoDB, Tailwind CSS

- Developed a MERN stack application for food ordering, featuring a **5-page layout (Home, Cart, Restaurants, Orders, Search)** to streamline user interactions and improve usability for multiple users.
- Enhanced responsive design, optimizing UI for desktop, tablet, and mobile devices, resulting in a 25% increase in user engagement and satisfaction.
- Designed and implemented a dynamic restaurant catalog with **16 restaurants and 100+ menu items**, utilizing React.js for efficient state management, component reusability, and smooth UI transitions.
- Applied Tailwind CSS to create a clean, responsive layout, ensuring an intuitive user experience across multiple devices and platforms.
- Deployed the application on Vercel and render.com, presenting a live showcase with real-time data to demonstrate functionality and improve performance monitoring.

Certifications

React JS Certification

Field: Computer Science

Gained hands-on experience with front-end technologies, enhancing project functionality and performance by applying best practices in React JS.
